

Online GBV AoR Community of Practice

Share experiences - Learn - Support one another

We all know how challenging and rewarding this work can be. It's important to be able to talk with others who understand. It's also important to keep learning in this ever-growing field. Many of us work in settings with few other GBV colleagues nearby and the opportunities for meeting with colleagues at workshops and conferences are too few and far between.

The online GBV AoR Community of Practice (CoP) aims to build community and facilitate continued learning and sharing among specialists working on GBV in emergencies.

The GBV AoR CoP offers a structured space for ongoing, field-centered, experiential learning, and a platform to discuss challenges, troubleshoot solutions, and celebrate successes. Discussions range from informal requests for suggestions and resources to thematic events led by experienced GBV specialists to further learning, motivate new thinking, and promote online discussions on critical issues that many of us are facing in our day to day work.

Initiated in 2018, the GBV AoR CoP is currently hosted on YahooGroups and facilitated by two part-time GBV specialists.

To join the GBV AoR CoP, send an email request to:

gbvcop-subscribe@yahoogroups.com

You will receive an automated email from YahooGroups with instructions.

Build community with your global colleagues

Managing GBV in Emergencies (MGBViE) is a three-phased learning program to strengthen the number, capacity, and support of GBV specialists leading emergency GBV programs. The MGBViE program includes: Phase I—a self-guided e-learning introductory course; Phase II—a face-to-face training workshop for graduates of Phase I; and Phase III—continued supported learning through mentorship and a community of practice. With support from the U.S. Department of State, Bureau of Population, Refugees, and Migration, International Medical Corps is leading the MGBViE learning program on behalf of the GBV Area of Responsibility.
